*The NEUBIE helps patients heal, recover and return to pre-injury functionality. **90% of patients report a notable improvement after the very first session!***

THE NEUBIE DIFFERENCE

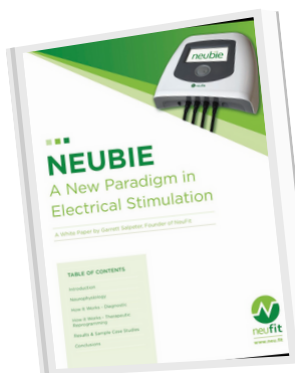

The **NEUBIE (Neuro-Bio-Electric-Stimulator) device** takes a different approach to traditional electrical stimulation by replacing alternating currents with a unique Pulsed Direct Current waveform that positively affects neurological control of movement and helps patients recover faster.

Used by PTs dedicated to finding the latest, proven innovations for patient care, the NEUBIE's neurophysiological effect delivers impressive results that outperform traditional methods, including:

- Responds to preferential, afferent signals by relaxing or fighting against it
- Serves as a neuromuscular reeducation for the central nervous system
- Resets the autonomic nervous system to enhance healing & recovery
- Improves traditional strength training with less work by training muscles without putting undue stress on ligaments, tendons and joints

Discover the proof behind why more physicians and physical therapists choose the NEUBIE over traditional methods.
